ABSTRACT

The introduction of blockchain innovation like DeFi has caused critical disruption across a wide range of enterprises. This recent new innovation has resulted in a growing influence that is currently transforming both the money and gaming industries. Non-fungible tokens were at the forefront of this rebellion, coping with the oncoming age of superior resource collection.

While blockchain has allowed no business to exist, it has had the greatest impact on the financial industry. Blockchain has completely altered the way the financial industry operates. Nothing remains unchanged, from decentralized monetary packets to fungible economic formations. Regardless, we are able to zero in on something else, something completely new, in this paper – non-fungible tokens (NFTs).

INTRODUCTION TO NFTs

A non-fungible token is a cryptographic beneficial resource on blockchain with an excellent identifiable proof code and information that distinguishes it from any other identical useful resource. As a result, unlike digital currencies, non-fungible tokens cannot be exchanged or sold at parity.

Crypto collectibles or digital collectibles can address a variety of things in the NFT space or NFT world, such as photos, pictures, sound or music records, plain text records (archives, PDFs, or tweets), 3D models, web-based games, virtual properties, virtual universes, metaverses, web area names, and other important resources.

NFT MARKETPLACE

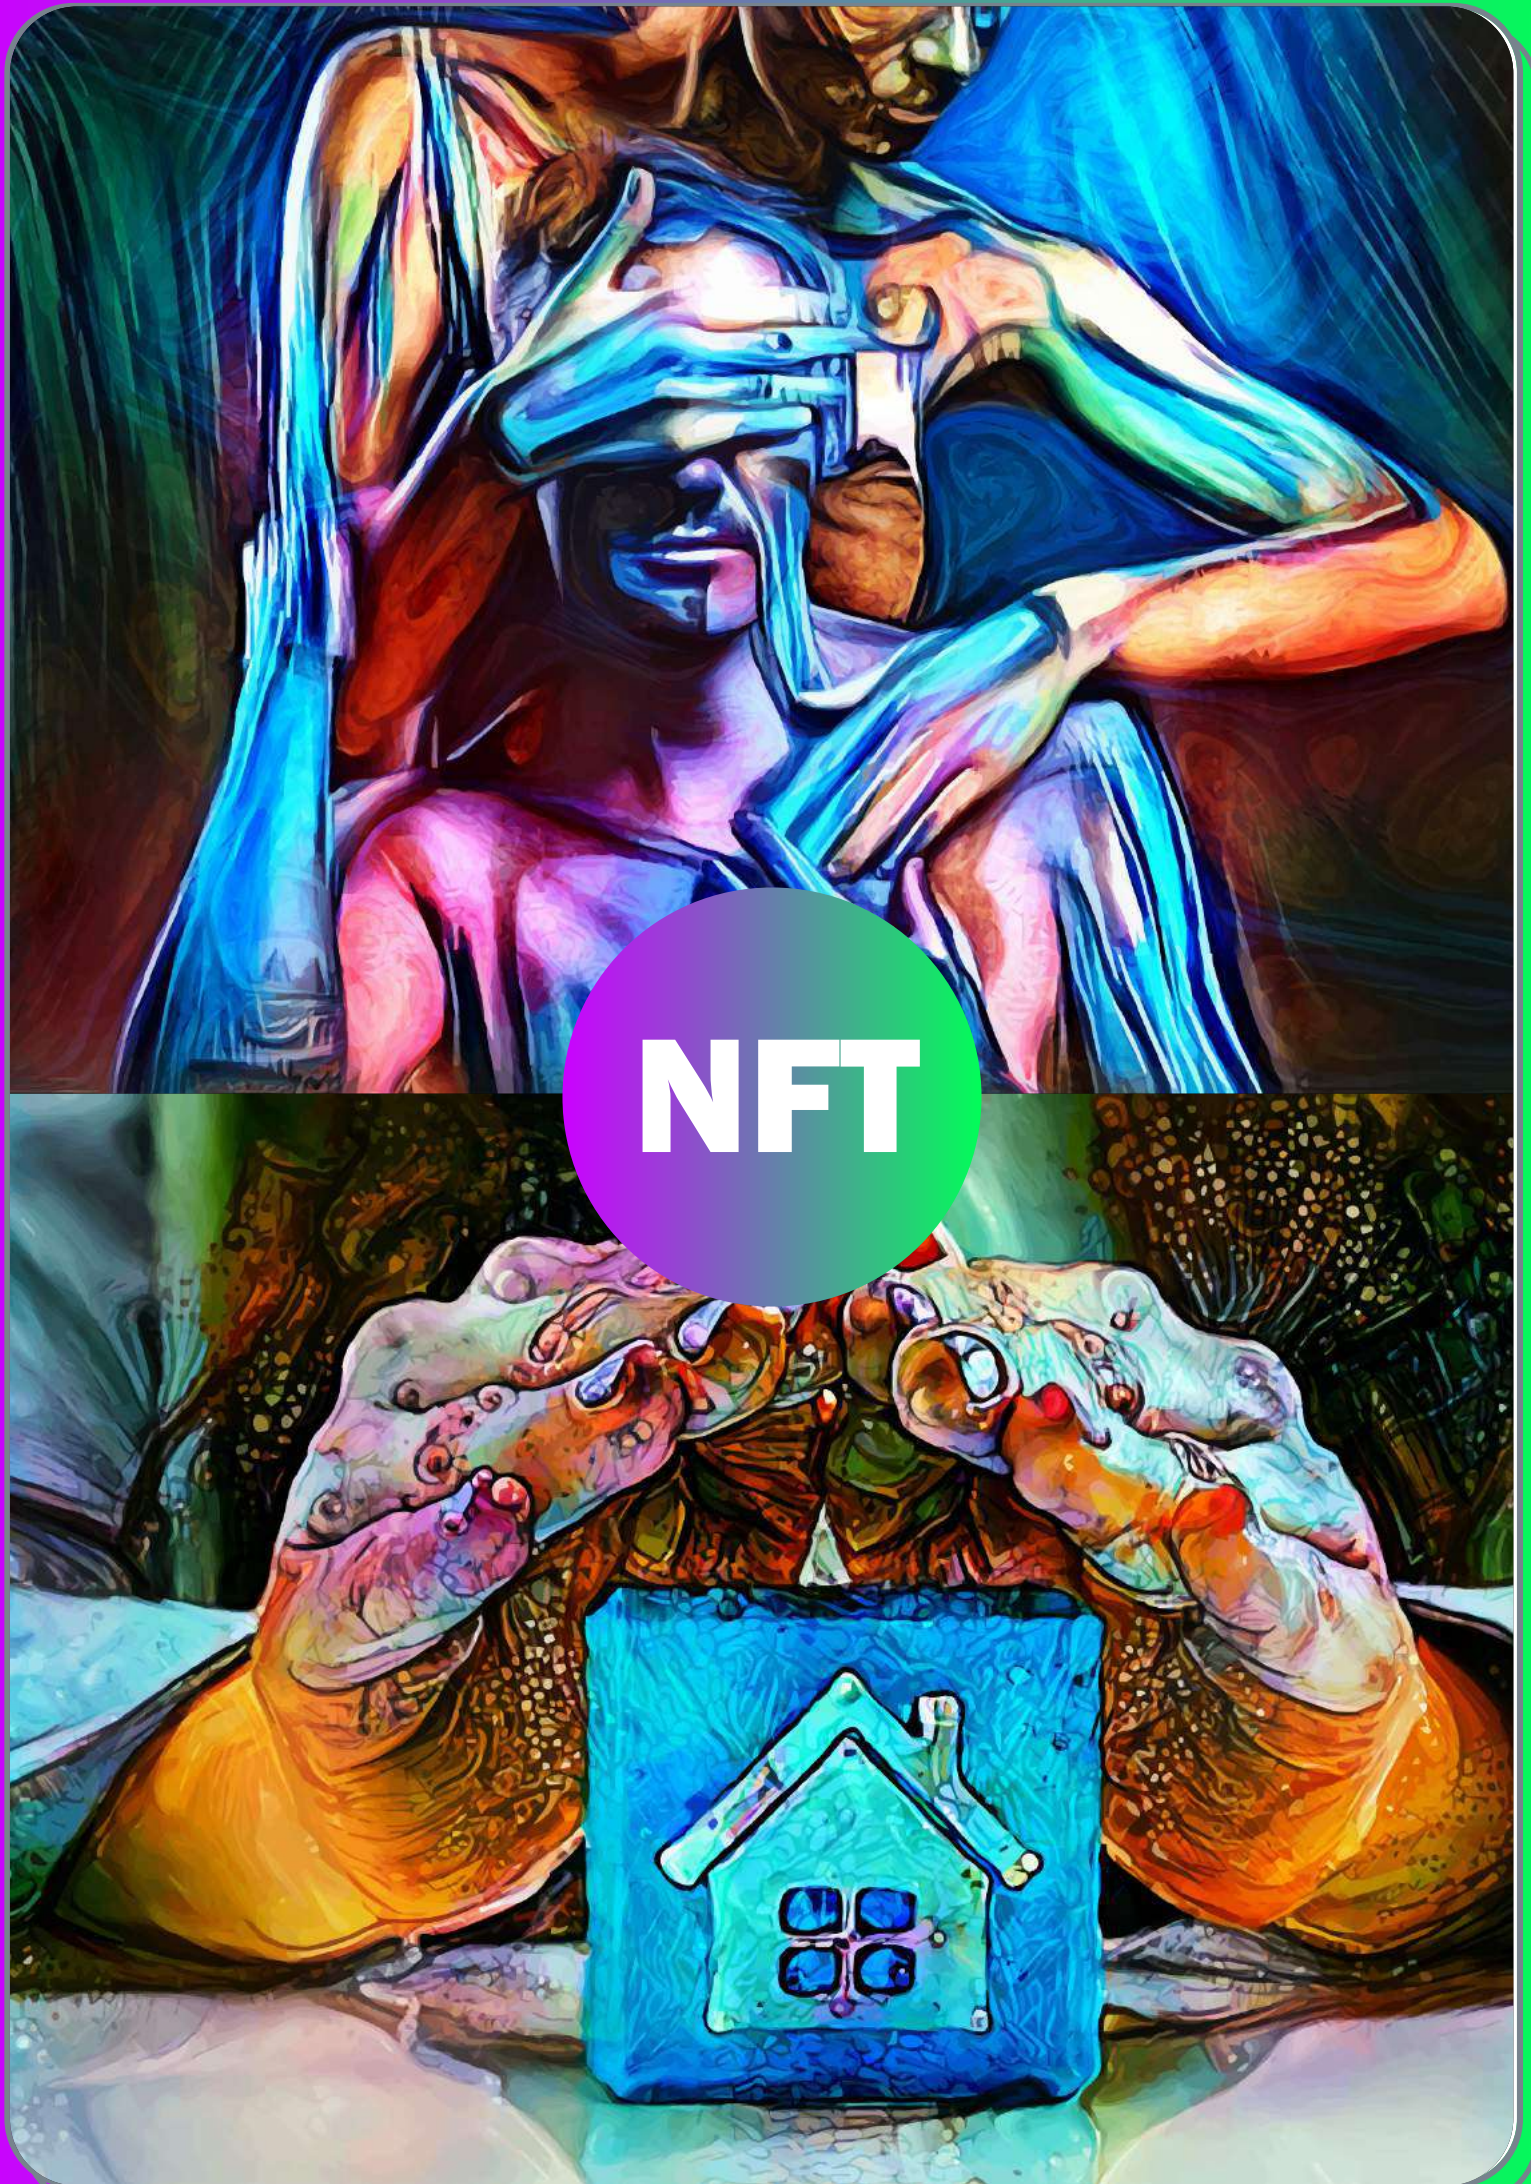

The NFT business middle degree is a decentralized degree that allows consumers to create, purchase, promote, and sell non-fungible tokens. The NFT business facilities are centered on boosting specific resources. For example, the Valuables NFT business center allows consumers to buy and promote tweets.

Specialty business facilities are gaining a lot of traction because they have a clearly defined major hobby group. As a result, you should consider the type of degree you'll send to developing an NFT company center.

Clients would subsequently be able to make their assets in the Marketplace by altering matters to demonstrate their work. The customer can also choose which payment tokens they want to be recognized for their uniqueness and set a price if the degree suggests it.

The next step in the painting process is to create a list of items that can be acquired. The consumer can choose between a first-rate bid and a closeout. When placing a thing for sale, an alternate is made to despatch an individual exchange keen agreement for the client wallet.

The stage may necessitate an assortment control, and NFTs will appear on the rundown after approval.

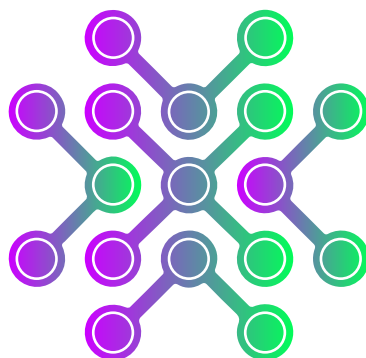

NFT

NFT MINTING

Minting an NFT refers to the method involved with transforming a computerized document into a crypto collectible or advanced resource on the Ethereum blockchain. The digital asset or record is put away in this decentralized data set or conveyed record perpetually, and it is difficult to alter, adjust, or erase it.

During the minting system, the maker of the NFT can plan eminences from each resulting deal, which will be a commission he can get at whatever point his work is offered to someone else, or is exchanged on the optional market.

THE INTRODUCTION OF METAVERSE INTO THE NFT WORLD

The metaverse is a constantly digital environment in which several individuals can interact and build articles while operating on digital representations or symbols of themselves. Consider a cross between a realistic computer-generated simulation, a massively multiplayer online pretending game, and the internet.

The metaverse is a sci-fi concept that many in the innovation industry envision as a replacement for the modern web. It's merely a dream right now, but companies like Facebook are working to make it the setting for a few online sports, in addition to work, play, thinking, and purchasing.

The phrase can refer to digital environments that have been improved with virtual or augmented reality. Some individuals also use the term metaverse to refer to virtual environments where users can move around and interact with one another.

There is also a metaverse that employs blockchain technology. Cryptocurrency can be used to purchase virtual land and other digital items.

ABOUT BITChro

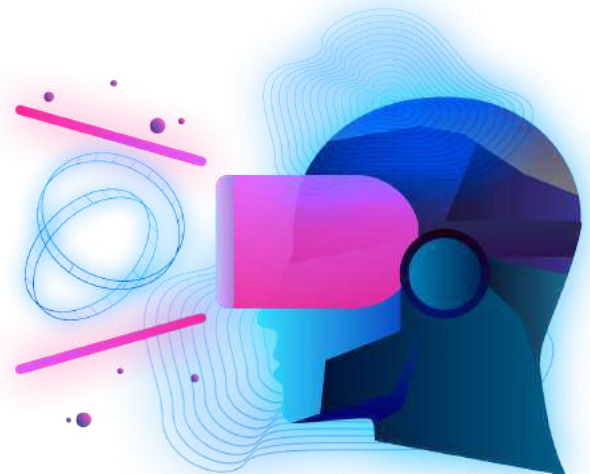

BITChro is a platform that intends to make nonfungible tokens (NFTs) more accessible as a financial asset in the metaverse. We are creating a new platform that will revolutionize NFT trading by incorporating cutting-edge metaverse technologies.

Our main goal and point is to build a nft marketplace integrated with metaverse where our users can get to create or mint unlimited tokens, and also trade those minted NFTs to generate profit for them.

Nonfungible tokens provide holders of digital assets with a genuine sense of ownership (NFTs). It should be highlighted that these digital assets can have real monetary value.

As a result, we intend to foster the creation of new trade activities and jobs in both the metaverse and the real world. Nonfungible tokens (NFTs) will catalyze massive new financial development and establish a new norm for ownership.

Metaverse

BITChro CORE VISION

We intend to build a platform that will use the metaverse to allow anyone to sell, purchase, and watch NFTs in an intriguing way, whilst generating enough profits for the minted or created NFTs; we intend to merge these disparate online worlds into a single seamless entity.

The metaverse will be used as a digital platform for the immersive exchange of digital and offline items and services, as well as digital assets such as nonfungible tokens (NFTs).

BITChro NFT MARKETPLACE

The integrations of BITChro NFT Marketplace and BITChro Finance succeed as complementary additions to connect crypto projects and users of various interests from all over the world, pioneering and realizing the world's leading SocialFi metaverse, with a hardtop convertible crypto social media serving as the backbone of the entire ecosystem. Our network will give users access to the most advanced non-fungible token (NFT) marketplace, which will allow them to safely purchase, sell, and trade their digital assets, as well as license them for commercial use.

We are pleased to announce the launch of the BITChro NFT Marketplace! With this platform, we want to be a cornerstone in the development of a new economy for virtual products and services. A team of specialists is leading the project development, with the goal of developing the most user-friendly marketplace for nonfungible tokens (NFTs), such as art and music, among others.

ADVANTAGES OF BITChro

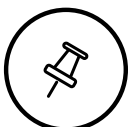

ETHICS:

BITChro has always been straightforward and upfront, and this is ingrained in our Nature and who we are. We feel that surrendering one's integrity is harmful to everyone. With our shareholders, users, staff, and followers, we will always be completely open.

CULPABILITY:

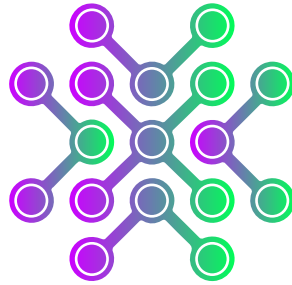

In BITChro, we treat our organization very carefully. We take complete responsibility and accountability in front of our shareholders, staff, users, and followers. We cherish your investment in us, whether it is money, time, or trust, and it is our obligation to make it worthwhile.

VERSATILITY:

BITChro believes in progress, but we also believe in being able to adapt to that development. We understand that there will be no growth unless we are adaptive and nimble. We recognize that every initiative confronts problems, but survival and progress go to those that accept, adapt, and pivot the quickest.

WHAT MAKE BITChro TOKEN SPECIAL

Team effort:

We combine team efforts and productivity to provide a better and fulfilling trading platform for users.

Attainable Vision:

Our future vision is one that is easily achievable given our team effort and combined productivity.

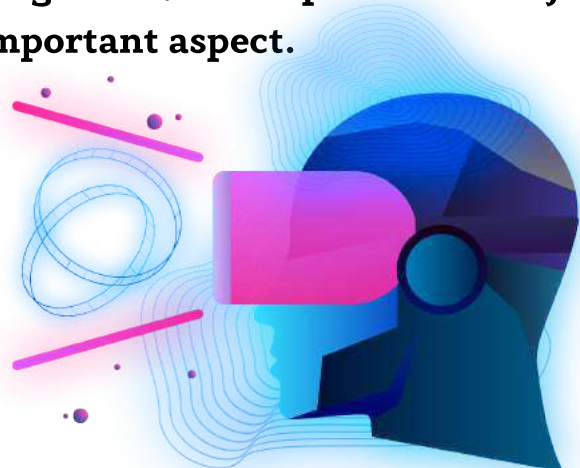

Growth:

Even as we work towards achieving the best for our clients, we know and also implement development. Won't it be better to work with a platform that sees growth/development as not just a thing, but an integral and important aspect.

Metaverse

FUTURE OF NFT AND METAVERSE MARKET STRUCTURE

Non-fungible tokens have grown in popularity over the years. These tokens are one-of-a-kind while still providing actual financial worth. Although it may appear like NFTs sprang out of nowhere, this is an innovation that has been in the works for some years.

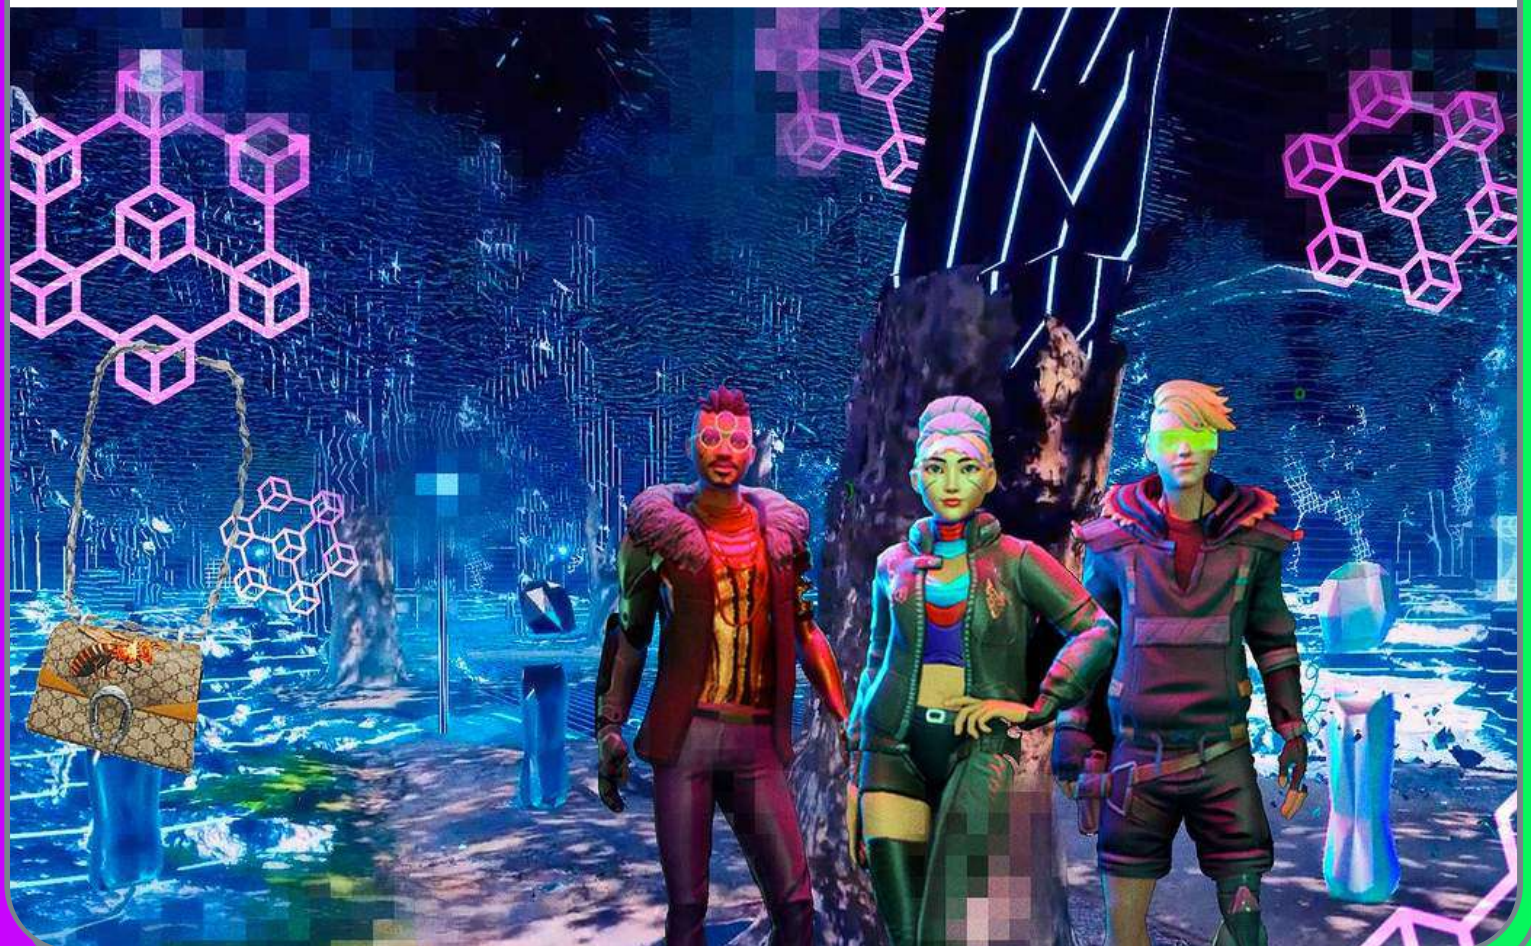

NFTs provide up hitherto untapped prospects for new business models, and it is precisely this that drives the NFT's future worth. Artists may attach terms and conditions to the NFT that ensure they earn a percentage of the revenues from each resale, which means they will benefit if the value of their work grows.

The optimal Metaverse will feature a thriving economy that will reshape how we distribute resources, while also allowing any participant to find "job" through virtual labor. Because of the use of NFTs, the Universal Metaverse will feature virtual economies that can develop in size and sophistication while also permeating not only the virtual world, but also the actual world. For the first time, NFTs grant virtual economy players digital property rights that are enforced by immutable code.

To assist in ushering in this virtual economic vitality, Bit chro would create an opportunity to develop NFTs that provide genuine user usefulness and serve as a reward for Metaverse individuals that give back to the Metaverse they inhabit.

Metaverse

BITChro FUTURISTIC VISION

We strive to provide our investors with only the highest quality products. To provide a top-tier innovative platform, we have integrated never-before-seen features into the BITChro NFT Marketplace! Features that would allow users of our platform to easily mint and trade NFTs. Some of BITChro future vision is listed below;

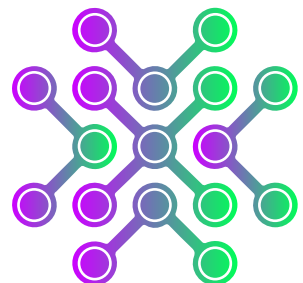

The implementation of cross-platform NFT trading. This platform would allow our valued users to trade between platforms by linking two platforms with the help of some sort of bridge.

Getting to partner with several NFT artists to bring about the ease of trading to our users.

We also plan to develop our gaming platform, that would serve as a play-2-earn (P2E) for our users.

BITChro Roadmap

Q2 2021

- Execution of BITChro Technical Model and market study.
- Team Development
- 1st core Business meeting at Dubai
- Finalisation of BITChro Business model and white paper

Q4 2021

- Release of Beta Version of BIT Chro NFT marketplace.
- Release of Beta version of Chro Metaverse ecosystem with live virtual tour.
- Listing of BTCH token on Tier-1 centralised exchange and Several Tier-2 Exchanges.
- BTCH token burning events
- World's first virtual investors meet through BIT Chro Metaverse Ecosystem (BME)

Q3 2021

- Registration and development of BIT Chro.com, world's first Internode marketplace for NFT & Metaverse Ecosystem.
- BIT Chro company Formation at United Kingdom (Private limited Company)
- Airdrop of BIT Chro Token (BTCH)
- Branding & Marketing of BIT Chro Business Model
- Conduct of Private and Public sale of BIT Chro Token (BTCH).

BITChro Roadmap

Q1 2022

- Token Burning Events and Buy back of BTCH token.
- Release of multimode for Cross platform NFT buy/sale.
- Listing of BTCH token on tier-1 exchange several Tier-2 exchanges.
- Launch of World's First multifunctional marketplace for NFT & Metaverse Ecosystem
- Mega Investors meet at Lisbon, Portugal.

Q2 2022

- Token Burning Events and Buy back of BTCH token at Market price.
- Development of NFT gaming platform
- Commercialization of BIT Chro Metaverse Ecosystem (BME) for corporate uses.
- Listing of BTCH token on Tier-1 & Tier- 2 Exchanges.

Q3 2022

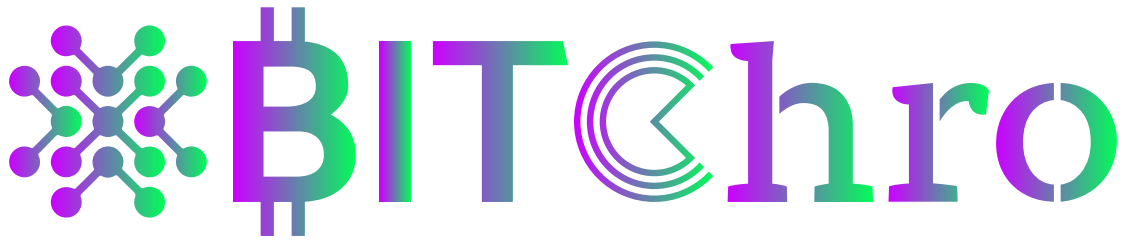

- Partnerships with Several NFT artists
- Investors meet at Singapore.
- Token Burning Events and Buy Back of BTCH token at market price.
- Development of NFT lottery and real money games

Q4 2022

- Release of BIT Chro Updated Whitepaper version 2.0
